#### **BRIEF**

Qingdao Lexon Heavy Machinery Co., Ltd. (Lexon), rooted in Qingdao, focus on the world. We adhere to the principle of customer first, quality first, all of our colleagues have deeply plowed in concrete machinery field for more than 20 years, in this field we have accumulated much installation, commissioning and maintenance experience, in the past 20 years, and we always firmly believe that the solid trees depend on the deep roots. Our domestic and foreign markets will always base on high quality and good service, to provide you with high-quality products and services are our consistent aim over these years. We hope we would have opportunity to sever our dear customers.

Now our main products as follow:

#### 1. Truck-Mounted Concrete Pump / Truck Mixer Series:

Lexon insisted on producing and sales in dependence, we not only sale our own small and medium-sized concrete truck mixer, but also as the golden agent of Beiqi Foton motor co., ltd.(Foton Motor), we perennial agent sales Loxa L9 Truck-mounted Concrete Pump / Truck Mixer Series and provide best service.

#### 2. Concrete Mixer Plants Series:

We currently can supply HZS (H) / HLS / HZN / HZS series standard concrete mixer plant, we can also provide engineering procurement and construction project (EPC) and "Full rang care-free" service.

## 1. D78B chassis $6 \times 4$ series 12 m<sup>3</sup> truck mixer

Model	ZZ1253N4341D1N	Clutch type	CH430-19
Exterior dimension (L×H×W) (mm)	8585×2496×3225	Transmission type	HW19710
Gross weight (kg)	25000	Transmission ratio	1.0~~14.283
Curb Weight (kg)	9570	Front axle	HF9
Max. speed (km/h)	82	Driving axle	HC16 Double rear axle
Wheel base (mm)	4025+1350	Steering device	GC120-15
Engine model	D10.340-40	Brake type (Service brake)	Dual circuit air brake
Max. power (kw/rpm)	249/1900	Brake type (Parking brake)	Spring parking brake
Cab	D7B flat top cab	Tires	12.00R20-18PR

#### **Manufacturing Parameter:**

Agitator Capacity (m³): 12							
Drum inclination (°): 12		Remnant Ratio of Discharging:≤0.8 (%)					
Feeding/ Discharge speed	$(m^3/min)$ : Feeding speed: $\geq 3$ , Discharge speed: $\geq 2$	Fuel: Diesel					
	Hydraulic System						
Variable pump:	Eaton	PMH P110(PMP)					
Motor:	Eaton	PMH M110(PMP)					
Gear Box:	580L(Bonfiglioli)	PMB7.5sp(PMP)					
Radiator: Kaipeng							
	Water Supply						
Volume of Water Tank	Volume of Water Tank 400						
Water Supply Type: Air Pressure Type							

The new STR cab adopts the domestic mainstream design, matches the CNHDT D10 engine, with safe and comfortable cab. This D10 engine is powerful, economical, reliable and stable. The STR market holding quality is very huge, universal accessories, suitable for purchasing accessories, low maintenance costs, high second-hand truck residual rate, mainly fits for middle and short distance concrete mixing transport.

# 2. F3000 Series 10m<sup>3</sup>/12m<sup>3</sup>/14m<sup>3</sup> truck mixer

Model: SX5256GJBDR404 (12m³)					
Complete Vehicle Parameter					
Exterior dimension (L×H×W) :9810,9405,9505,9990×2490×3950,3915	Gross weight (kg):25000

## FOTON LOXA L9 SERIES CONCRETE TRUCK MIXER

Qingdao lexon Heavy Machinery Co., Ltd. as the general agent of Beiqi Foton Group, our main products lines include L9 series of Truck-mounted concrete pump, truck mixer, cranes cover all the country.

As a new generation products of Beiqi Foton group, The L9 series combines the technology of China, Germany and USA. It adopts the integrated manufacturing system of Europe and America, the supply chain includes Cummins, Rexroth, Wabco, Knorr, Valeo, SACHS and Donaldson. All the products are reliable, efficient, energy, safe, and comfortable, the parameters are as follows:

# **Lexon Brand Concrete Batching Plant Series**

Qingdao Lexon is one professional manufacturer of concrete machinery in Qingdao, Shandong province, our products have such

#### features:

#### 1. High-strength wear-resistant materials.

Mixer lining life increased by 10% compared with the industry standard.

Stirring blade service life increased by 10%.

Discharge chute liner service life increased by 20%.

#### 2. High precision measurement technology

Using the latest international high-precision measurement algorithm.

Bus communication, digital signal transmission, effectively raising materials weighing accuracy.

Material drop automatic correction technology.

In the production process via tracking the samples by flow, velocity, disc gap, amending the disc gap to ensure that the measured accuracy of material in real-time.

#### 3. Aggregates automatic fall compensation correction control technology to ensure error control in 1%.

#### 4. Environmental protection and Energy –Saving.

Automatic high pressure washout.

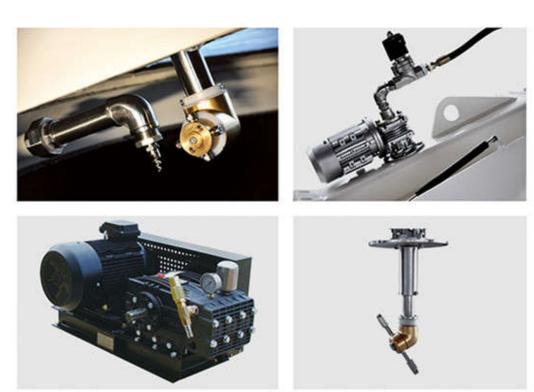

Productivity increase due to shorter cleaning time.

Saving labor costs due to automatic cleaning system.

Less wear and tear of the mixer.

Water saving due to exact spraying geometry of 3D nozzle system.

Washing water can be recycled for the next bath.

#### 5. High intelligence

Leading concrete ERP management system.

Integrated management of mixing station.

Advanced control systems.

Silo continuous material level display, real-time access to information.

High precision measurement controlling, accurate real-time inventory data.

Reliable data protection, automatic diagnosis technology.

PC/PLC controlled value-added services.

Admixture temperature controlling system.

CCTV management, laboratory management, the pound management.

Network Debug management.

Information Management (ERP).

Raw materials, supplies, sales, production management centralized.

Formulation ratio, vehicles, spares parts, financial management visible.

Internet remote office, multi station centralized management.
